

Superuse

Eric Peters

- Superuse staat voor....
- “Listen to the Material”
- Vragen

Superuse

Superuse ontwerpt al 25 jaar waardevolle plaatsten om te zijn, te ontmoeten en te werken.

- Realisatie van (niet alleen bouw-) **materiaal gedreven**, lage voetprint ontwerpen.
- Advies en hulp aan vastgoedeigenaren, architecten en bouwers.
- Ontwikkeling van methodes en instrumenten om realisatie te faciliteren.
- Groot, betrouwbaar netwerk.
- Ontwikkeling van innovatieve bouwmaterialen.

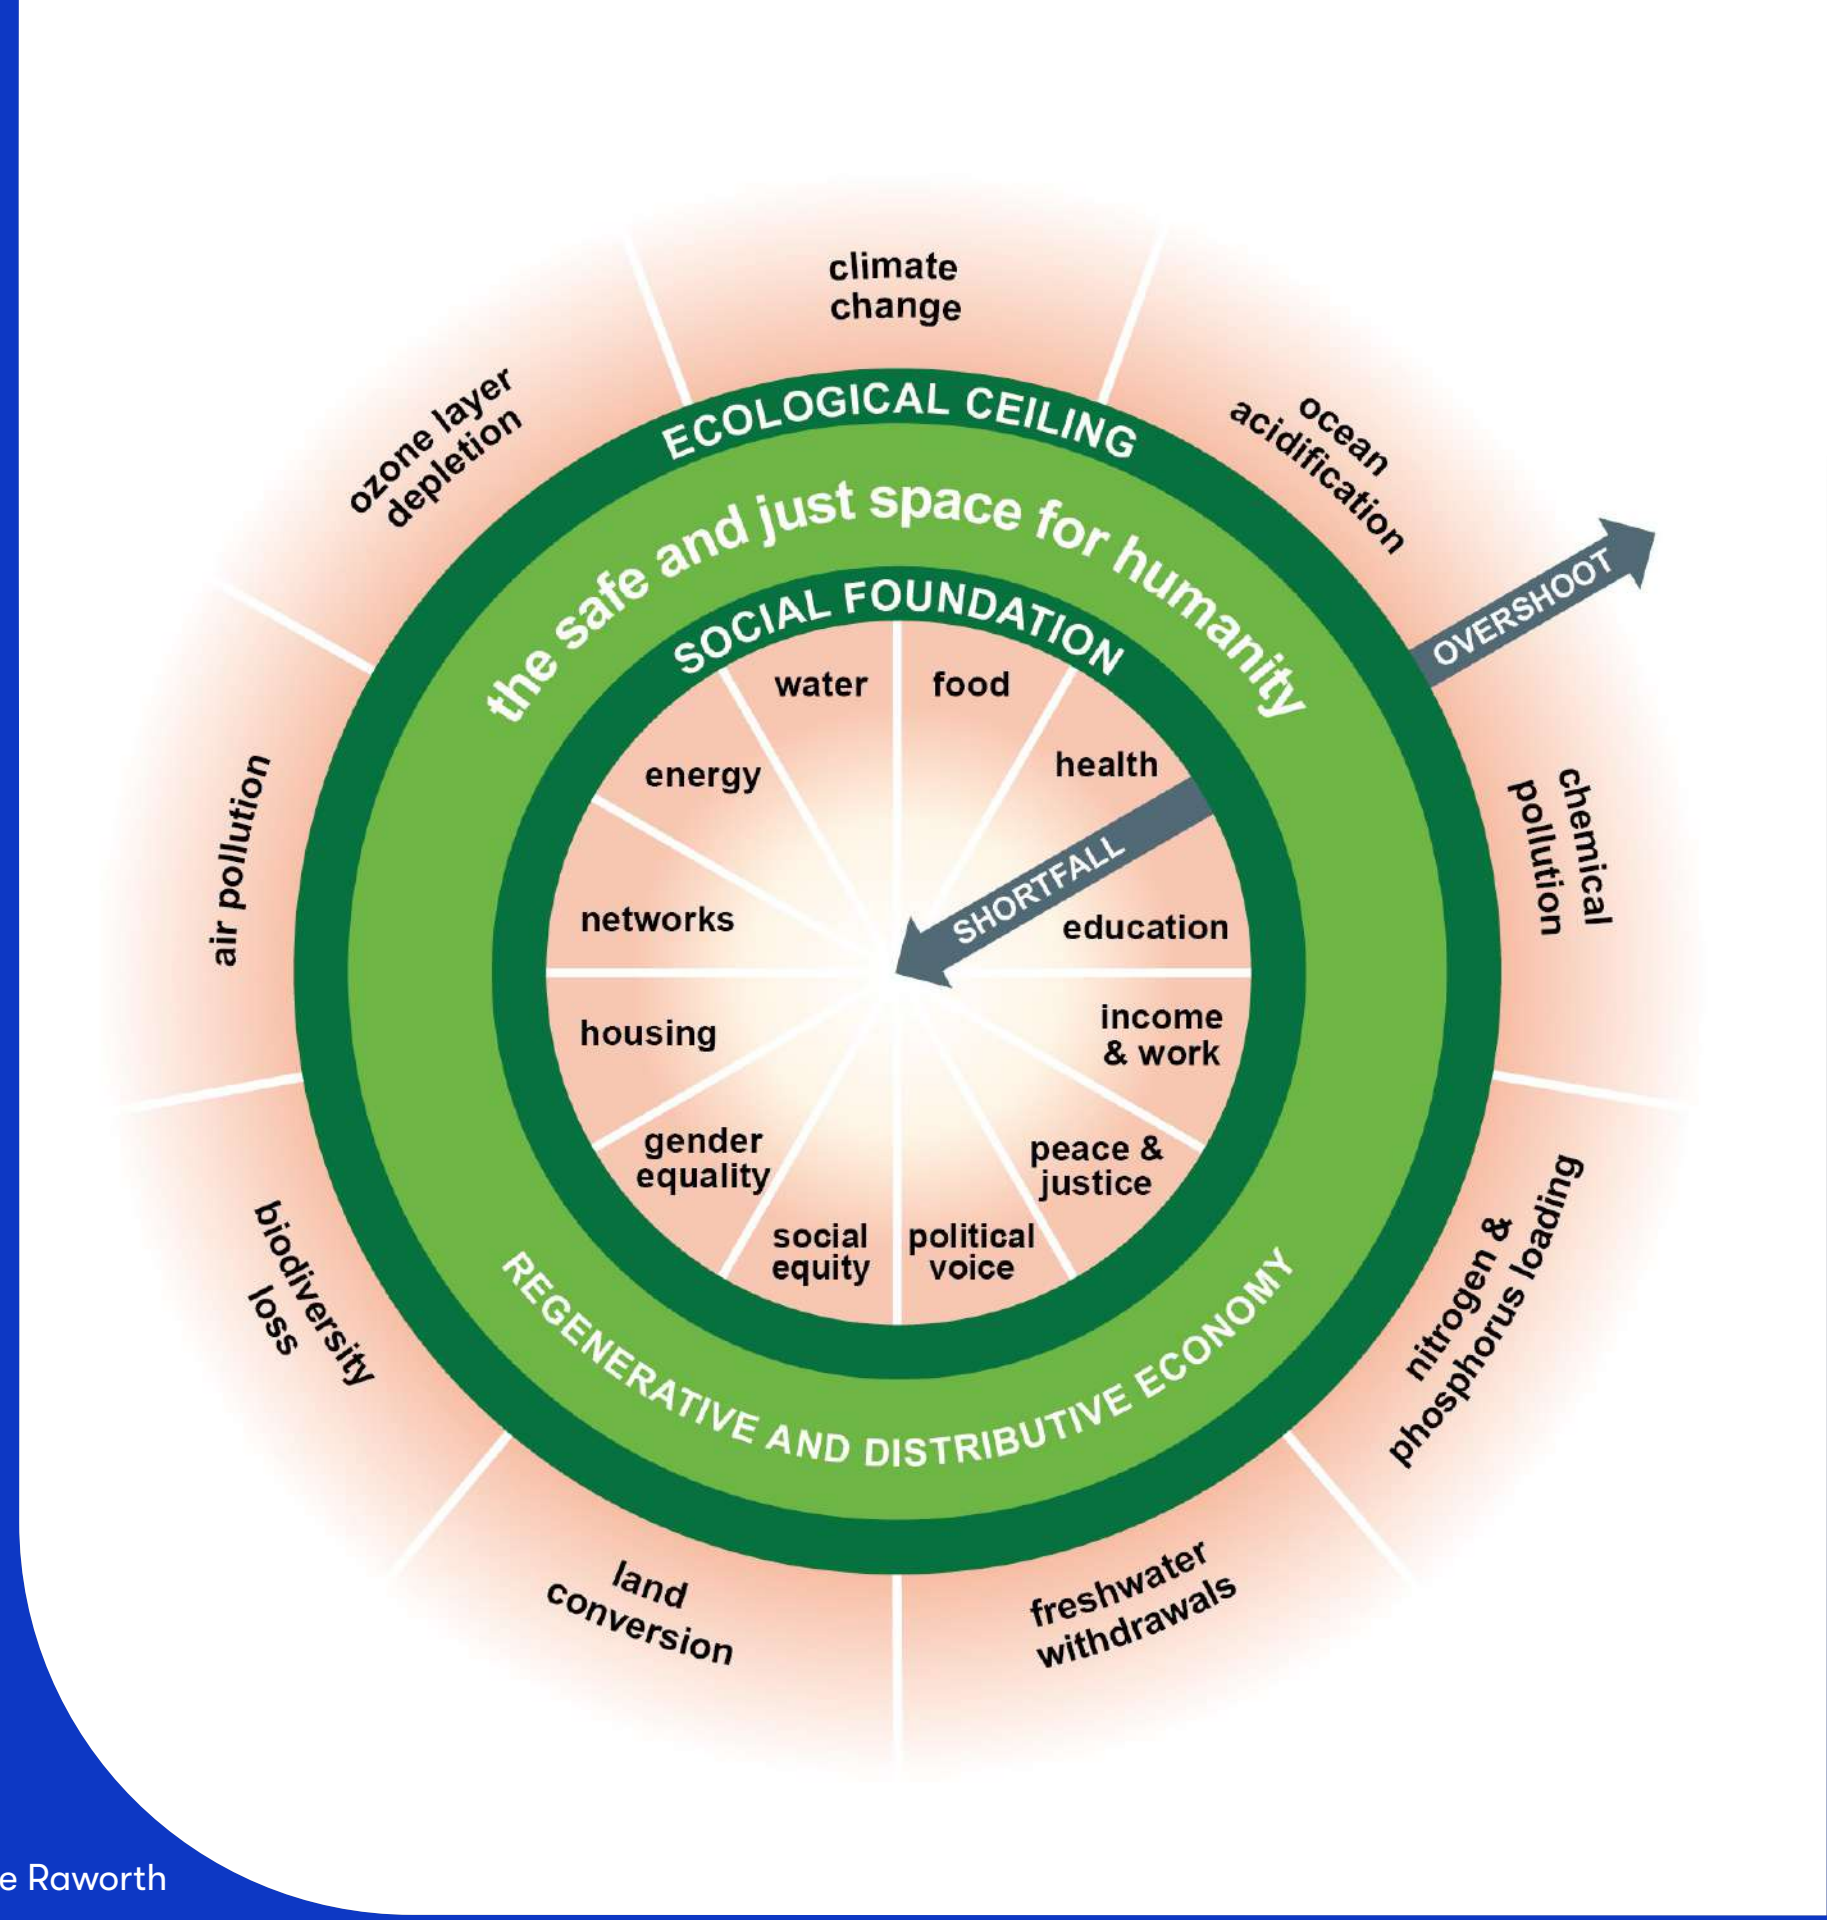

Waarom en hoe?

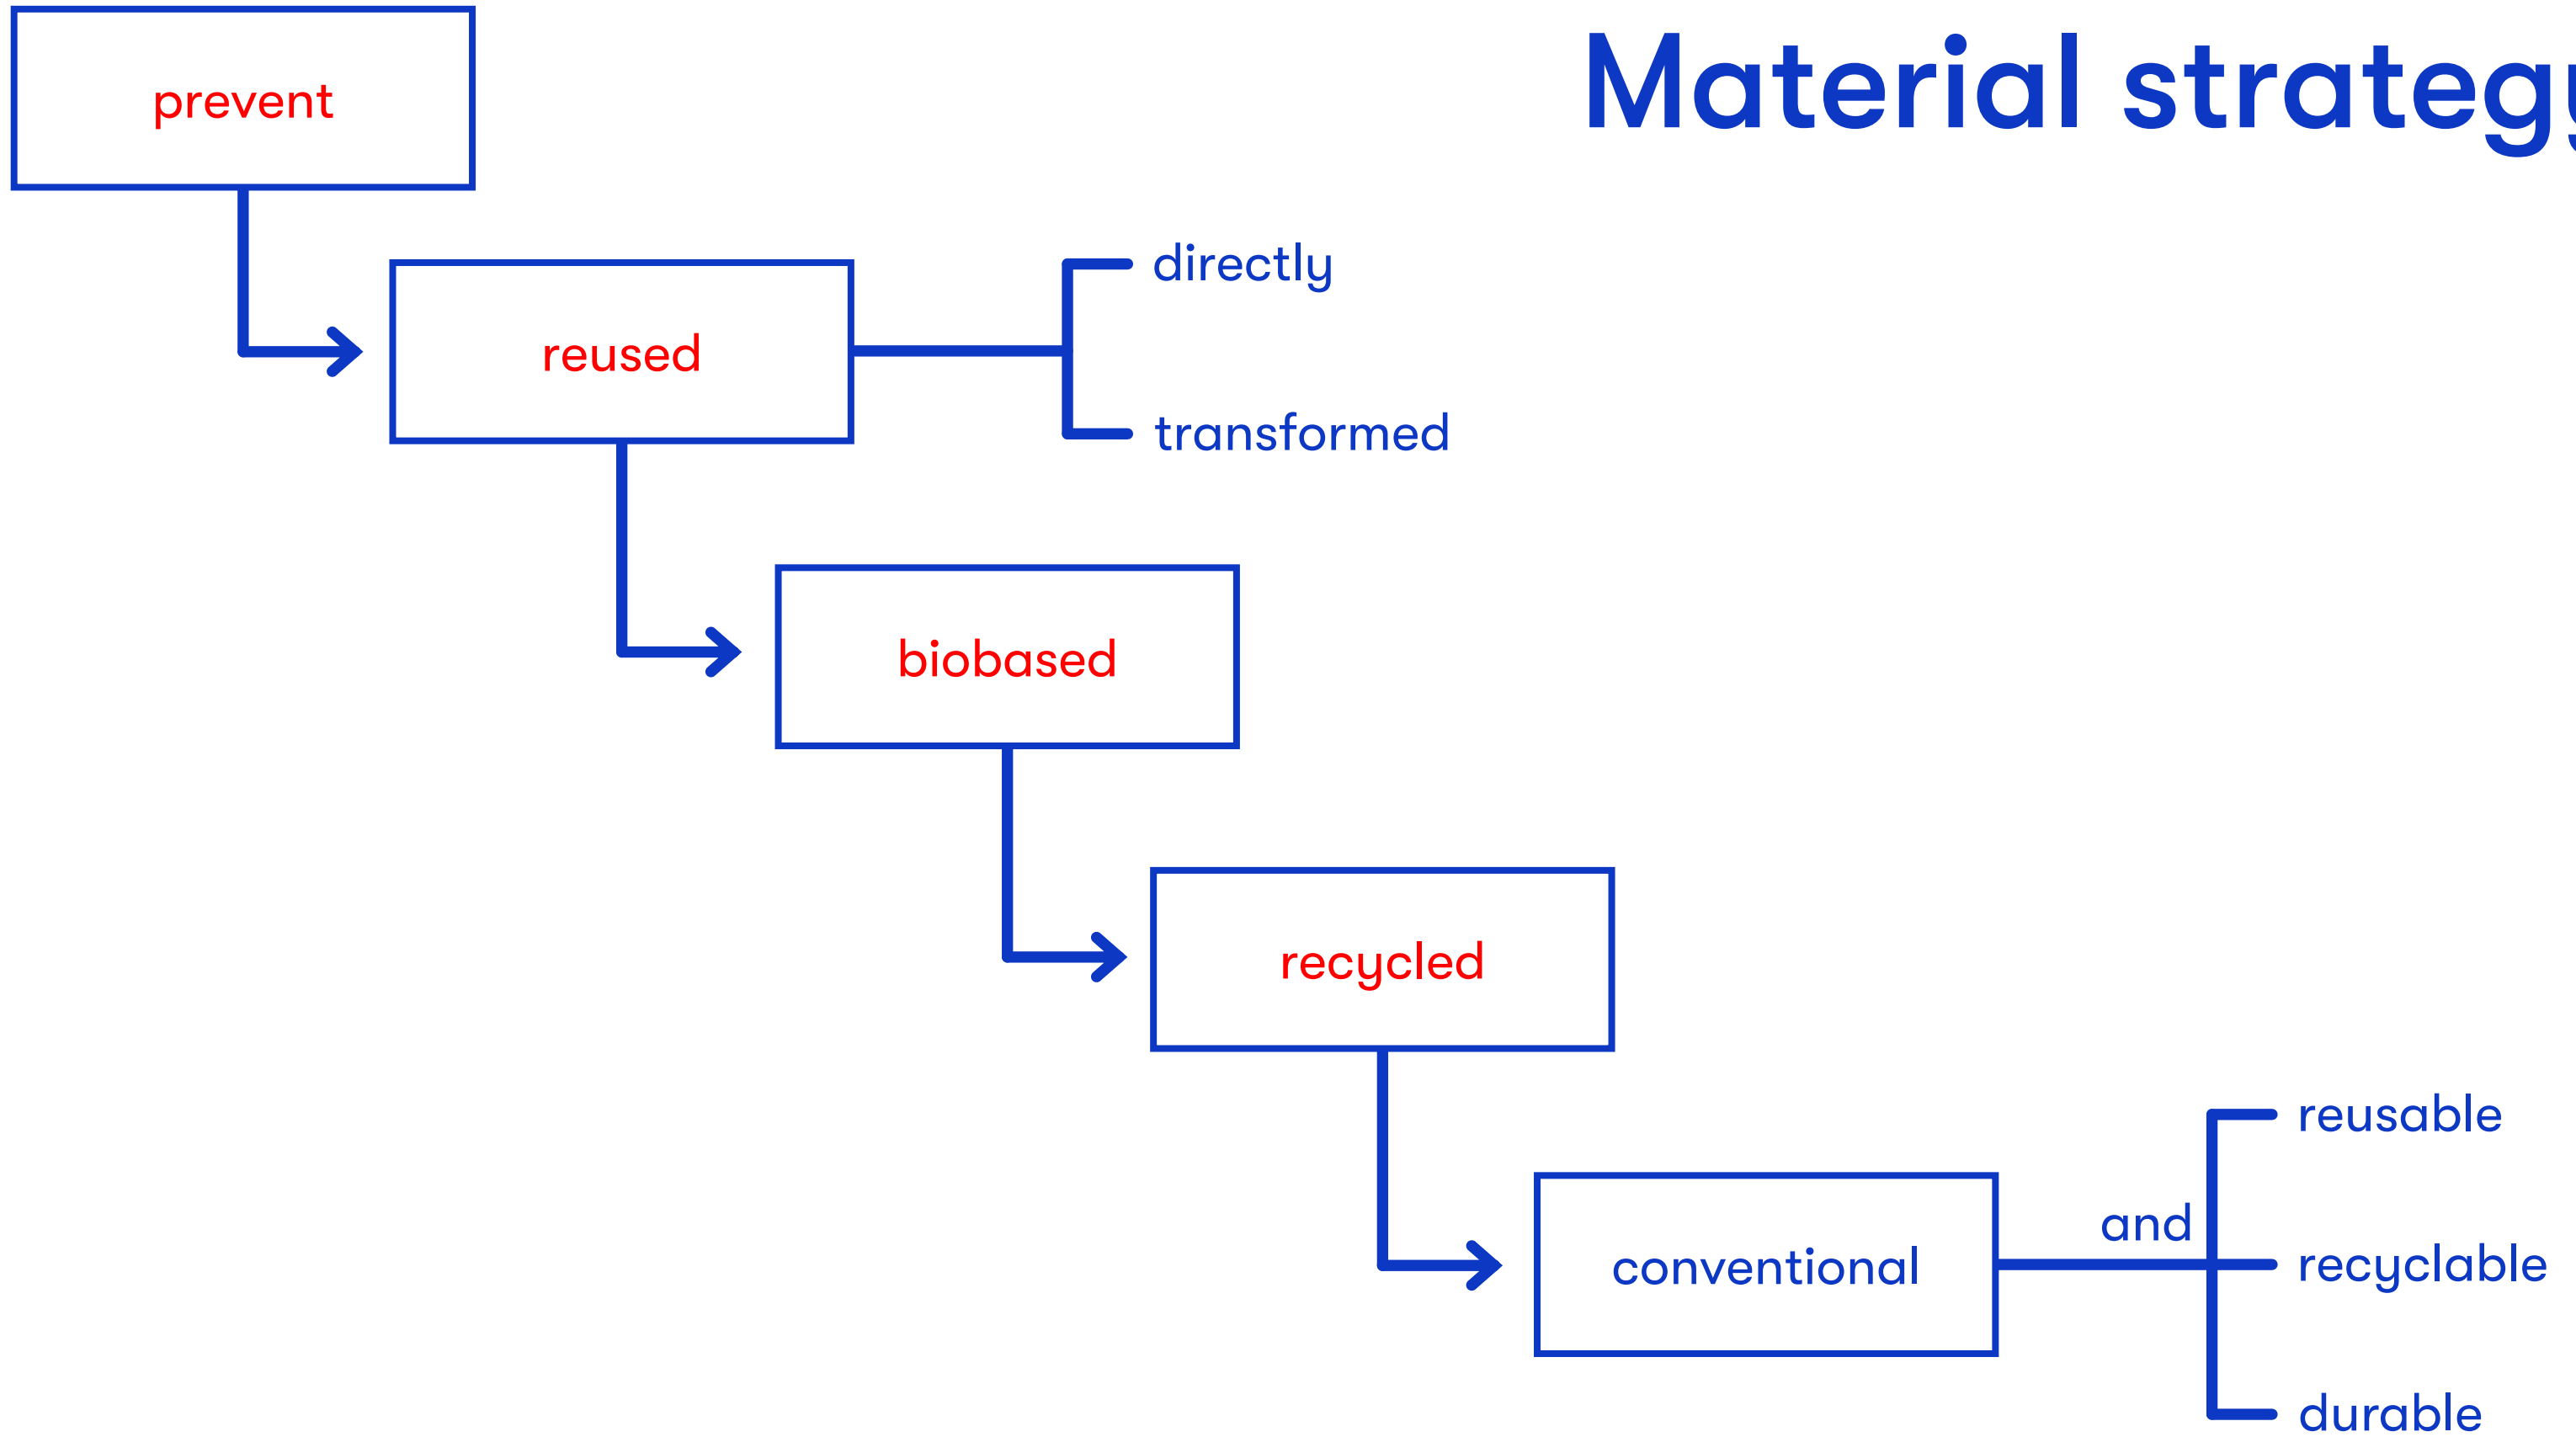

Duurzaam bouwen zeer legitiem maar complex.

Door dit wel te doen leidt je je organisatie op voor de toekomst.

Ontwerp- en materiaal strategie nodig.

Material strategy

SUPERUSE

of:

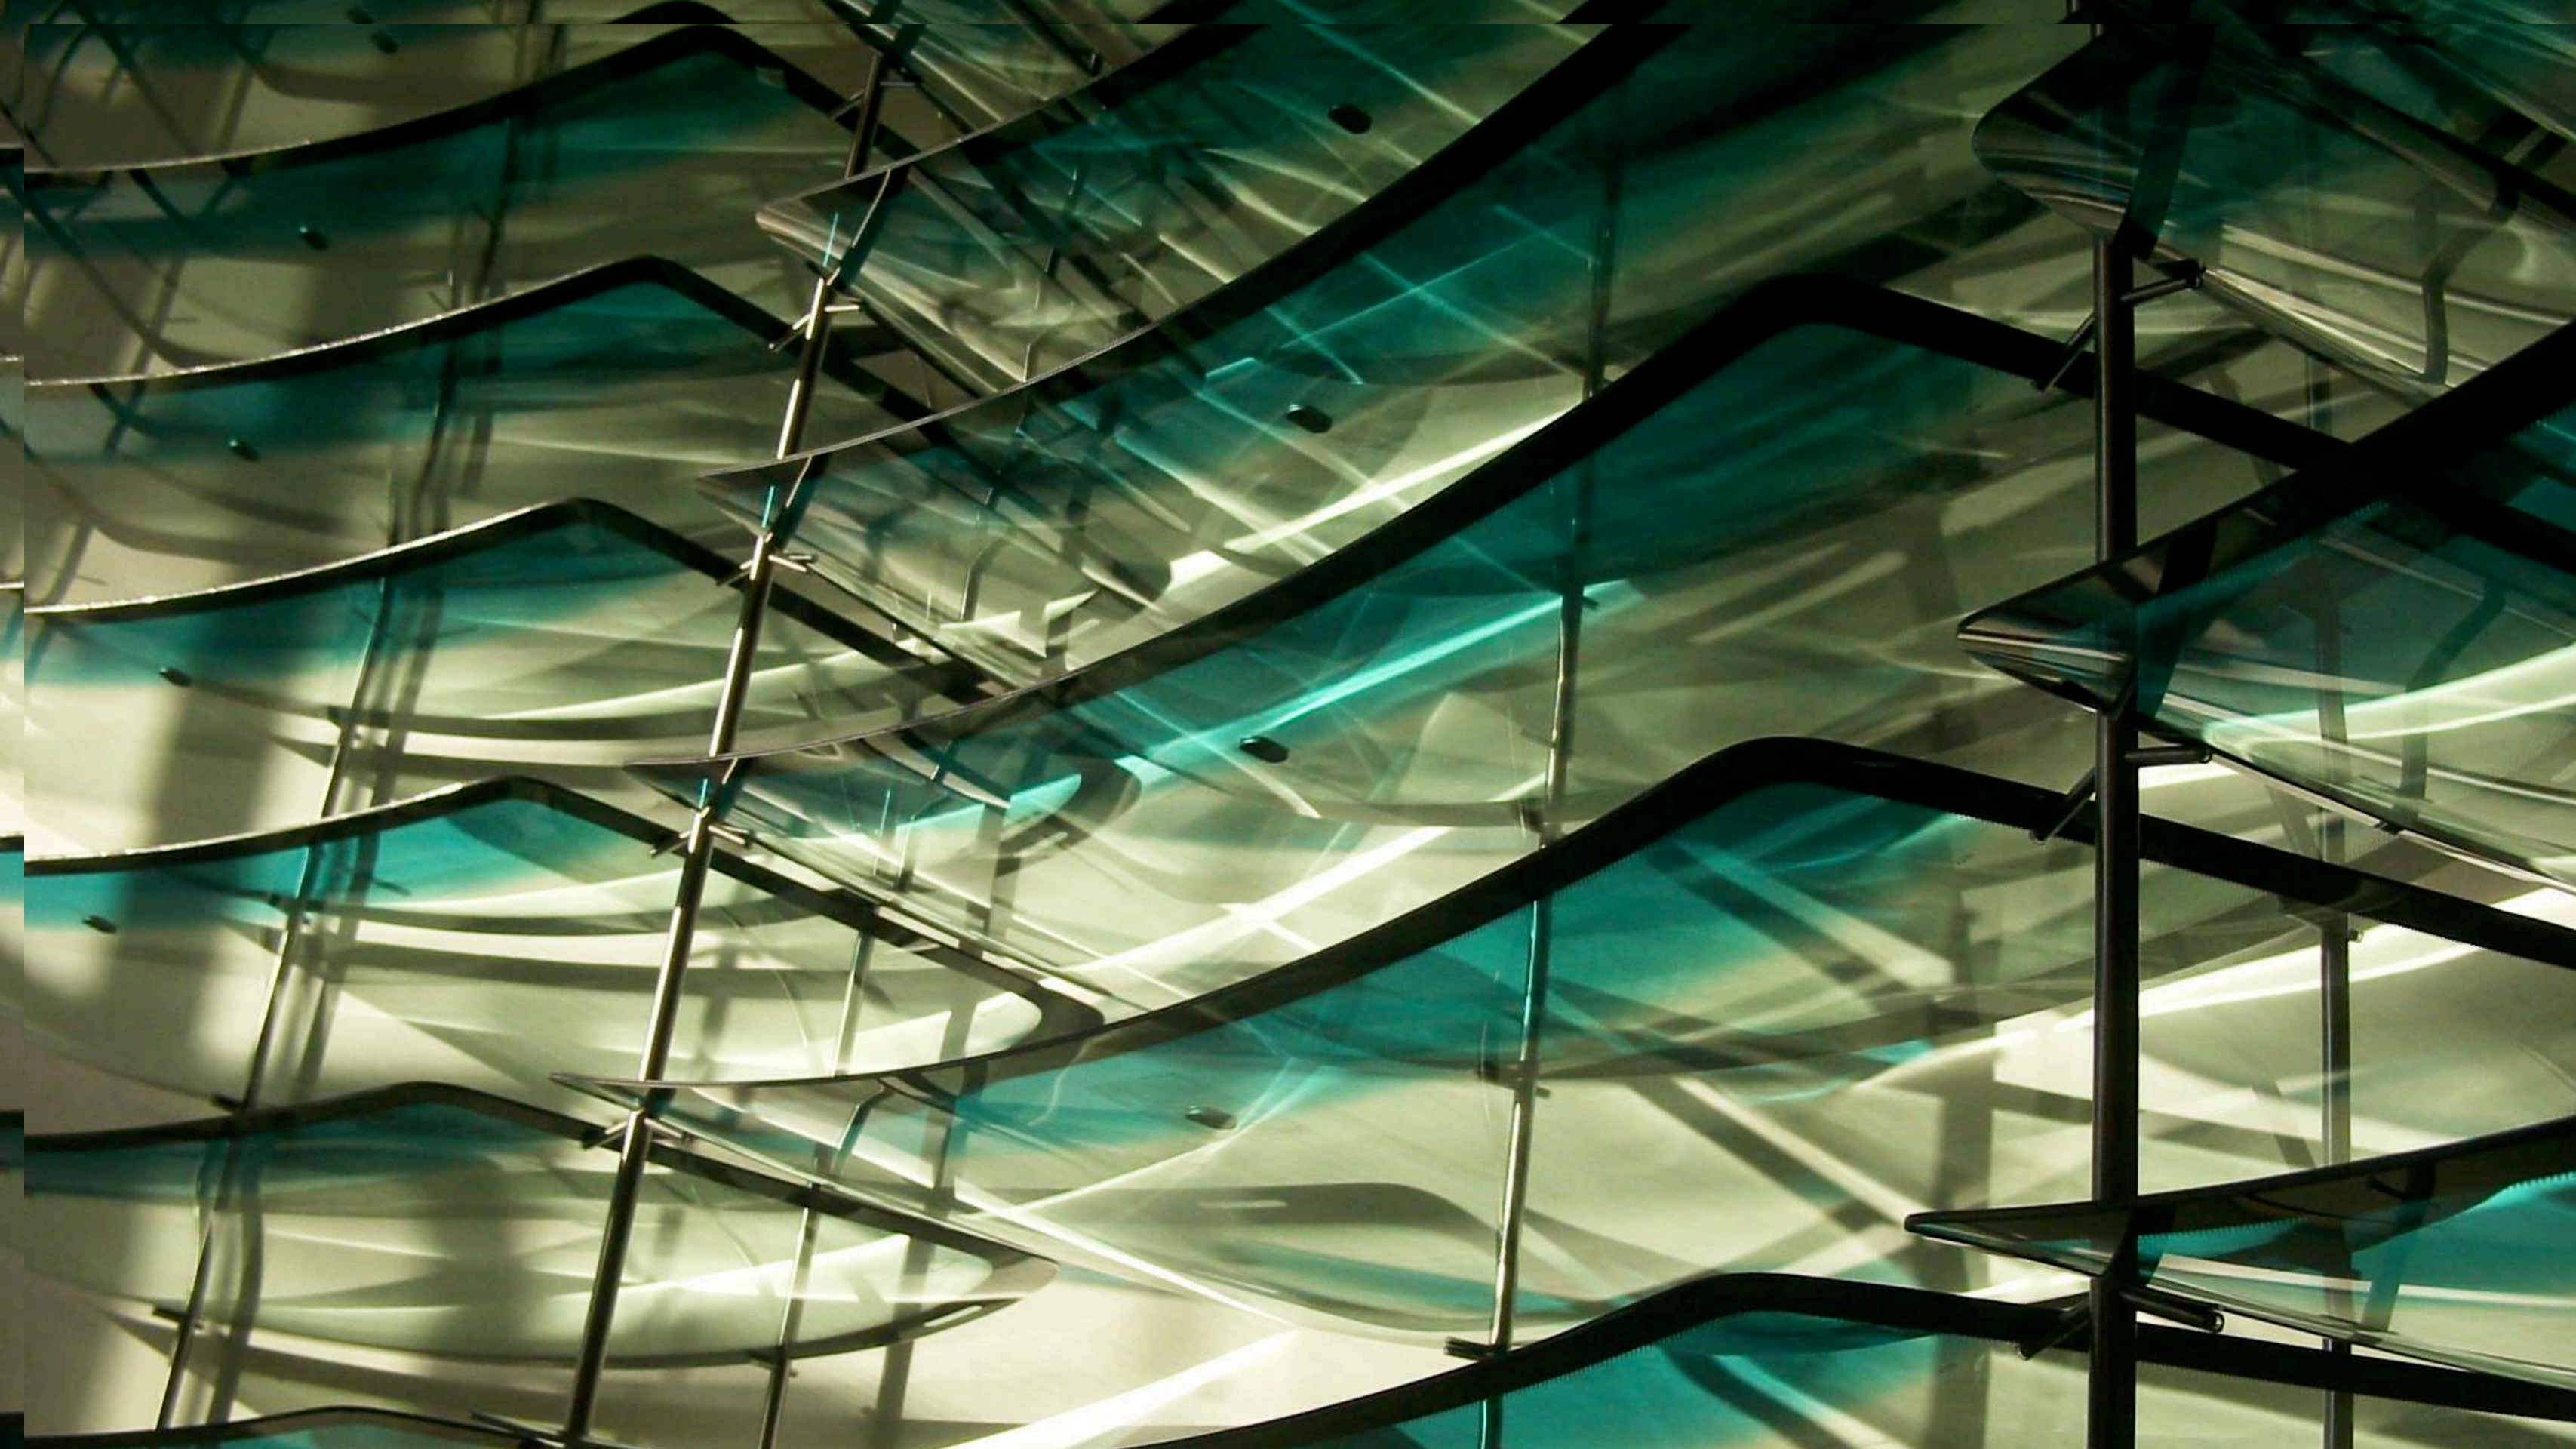

- Dead stock
- Construction or demolition waste
- Fast life waste
- Production waste
- End of Life

SUPERUSE

Dead stock

— Out-dated material that is no longer manufactured or no longer has repair or technical support.

SUPERUSE

Construction or demolition waste

— Material from construction, renovation and/or demolition projects.

SUPERUSE

Fast life waste

— Materials from fairs, exhibitions, et cetera. Usually of high quality and used for a short period of time with little wear and tear.

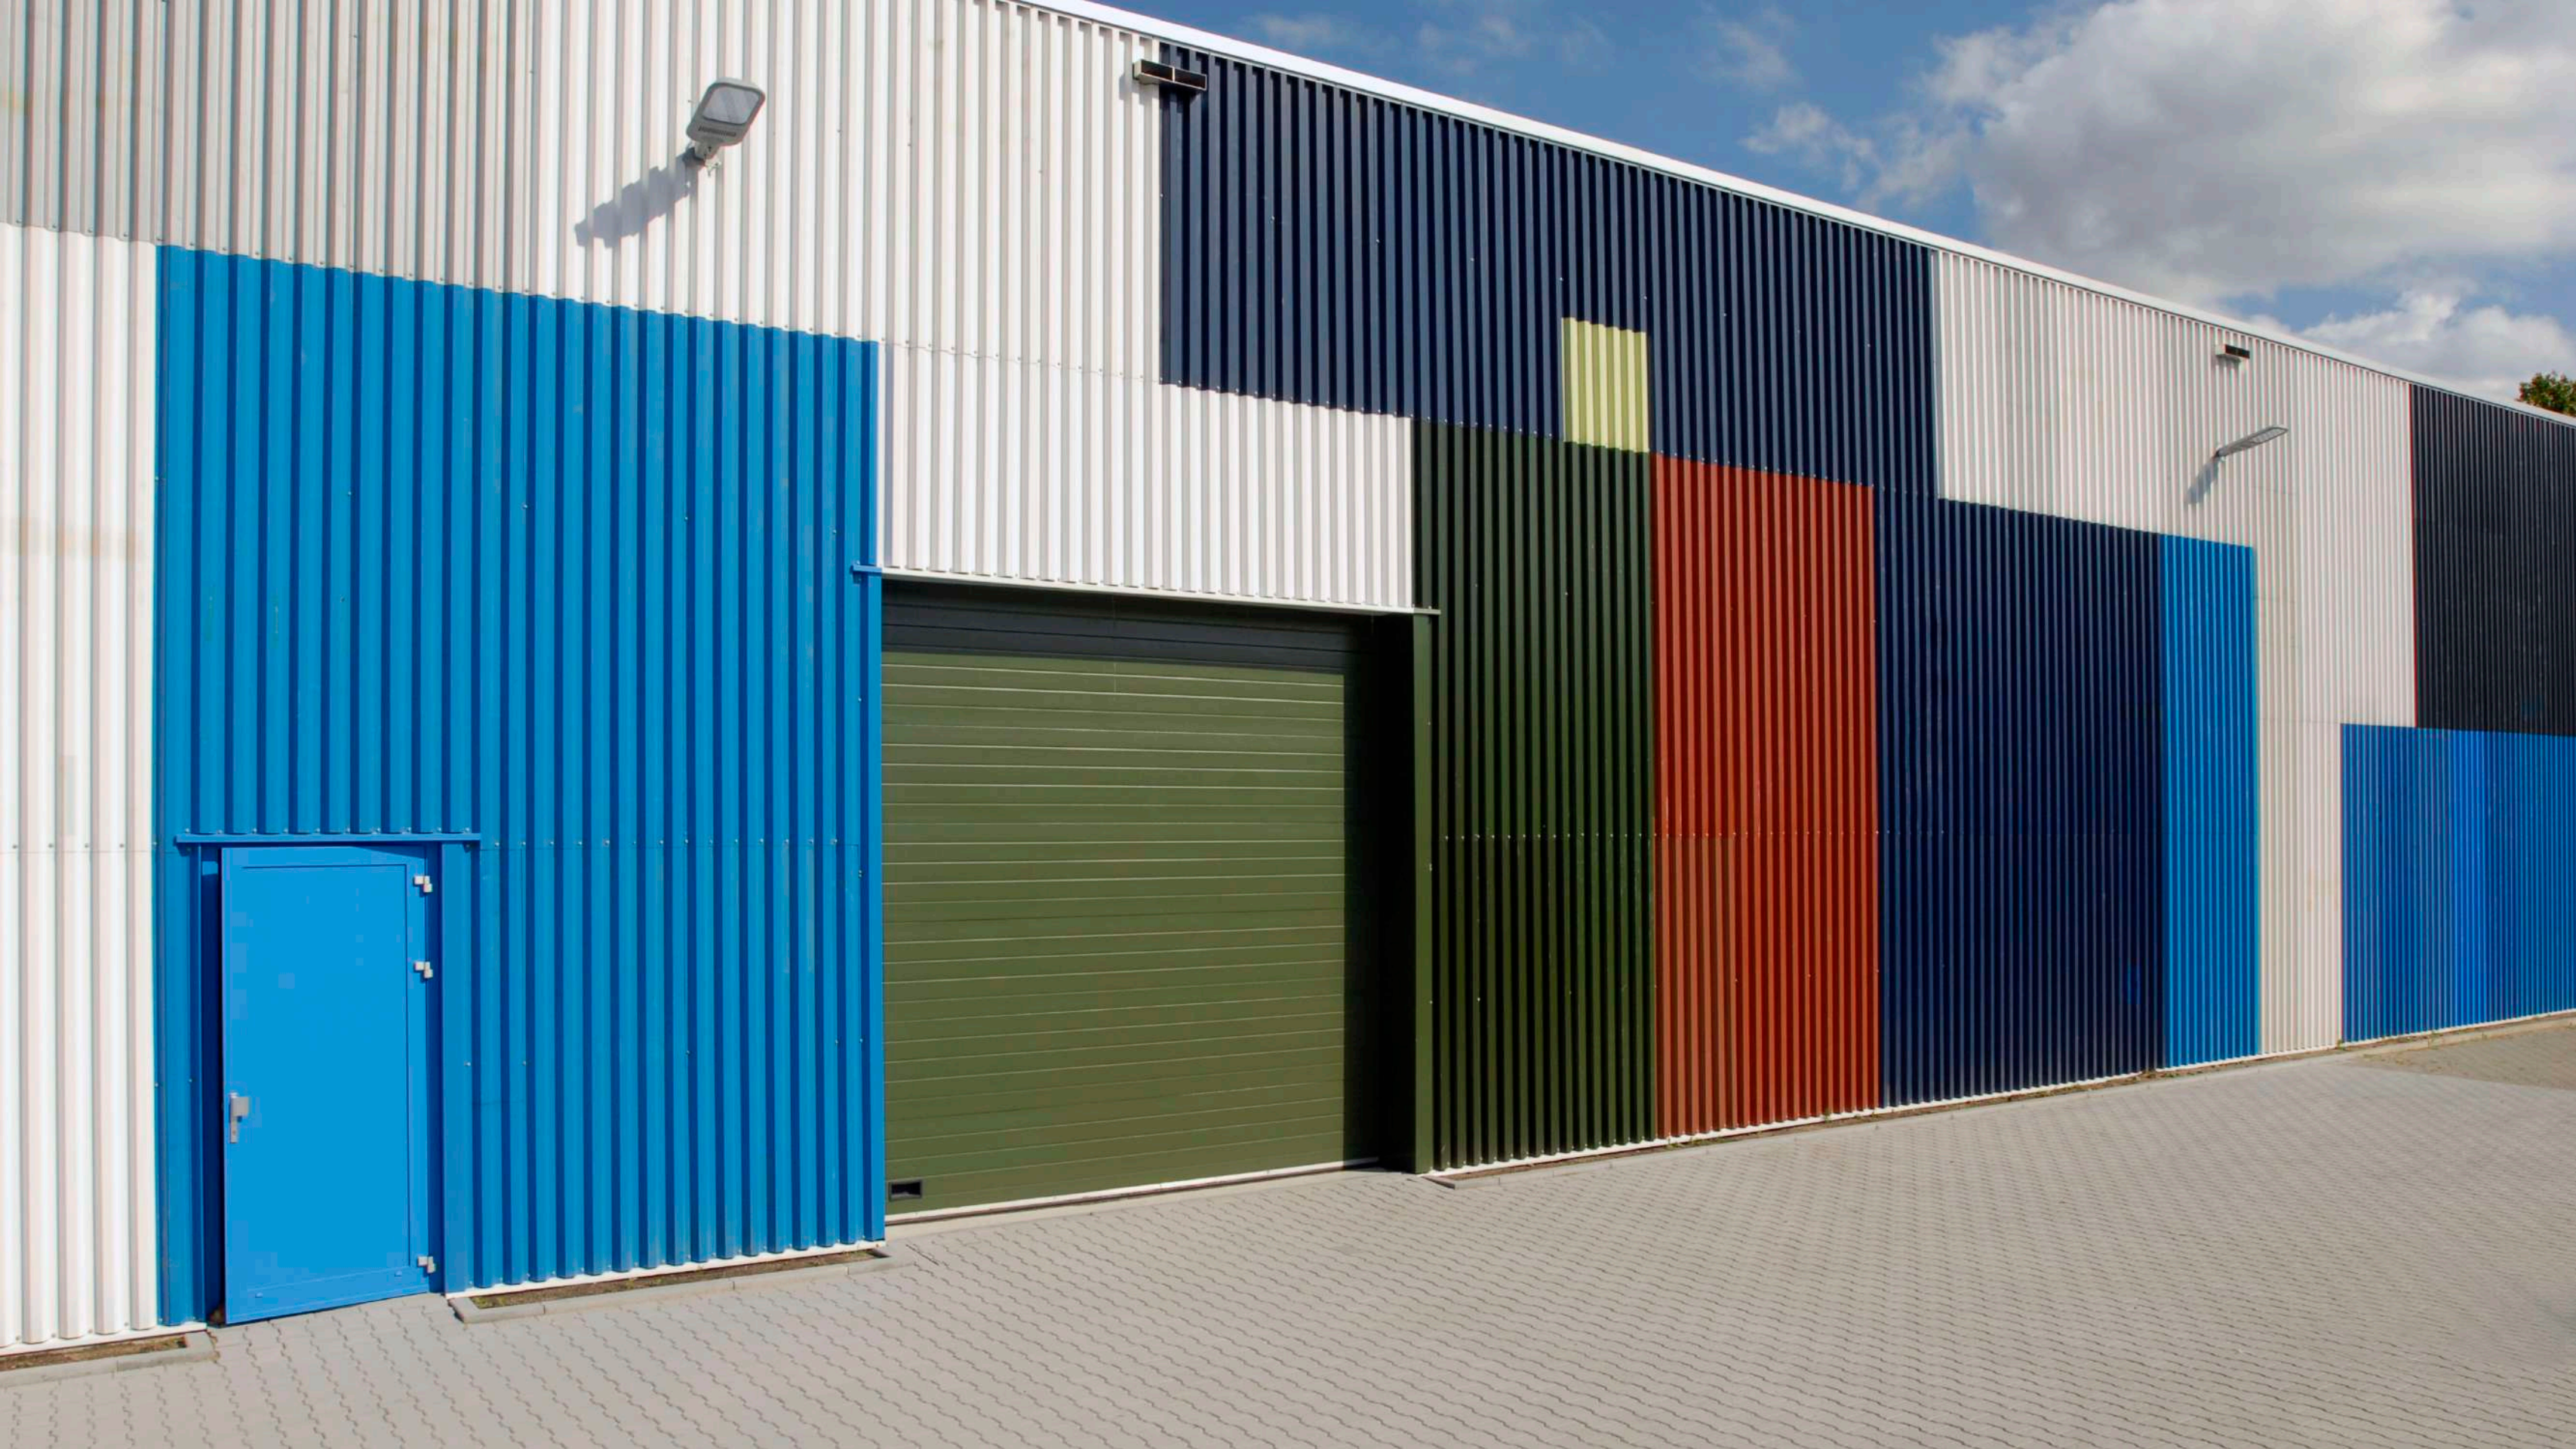

SUPERUSE

Production waste

— Residual materials from industrial production processes, including materials and components that fail quality control.
